

Vabhravi Pandey

+91 7250340347 | vabhravipandeyv@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

AI/ML undergraduate with hands-on experience building full-stack AI applications, RAG pipelines, and scalable backend services.

TECHNICAL SKILLS

Programming Languages: Python, Java, TypeScript, SQL

Frontend & App Development: HTML, CSS, React.js, REST API

Backend & Databases: Node.js, Express.js, FastAPI, MongoDB, MySQL, PostgreSQL

Generative AI: LLMs, RAG, Multi-Agent Systems, GPT-2 Fine-tuning

Machine Learning & AI: TensorFlow, Keras, PyTorch, LSTM, CNN, NLP

Data Engineering: Apache Spark, PySpark, Delta Lake, Azure Data Factory

Soft Skills: Teamwork, Project Management, Agile Methodologies

WORK EXPERIENCE

Goods and Services Tax Network (GSTN) New Delhi, India *Software Developer Intern* Jun 2026 – Jul 2026

- Engineered a fraud-detection system cross-referencing E-Way Bill and FASTag toll transaction data, built on a FastAPI/SQLAlchemy backend with a React and Leaflet-based dashboard to visualize vehicle trip routes and toll checkpoints.
- Designed a rule-based risk-scoring engine using geospatial calculations (haversine distance, bearing/direction analysis) to detect duplicate e-way bills, impossible average speeds, and route mismatches, classifying vehicles into LOW/MEDIUM/HIGH risk tiers.
- Built an internal IT asset management platform (InvenTrack) with a React/TypeScript frontend and Express/MongoDB backend, designing the database schema, REST API, and JWT-based authentication flow to track company hardware and assignment history.

PROJECTS

GST Risk Manager | [Live Demo](#) Aug 2026

Python, FastAPI, React 19, Isolation Forest, XGBoost, RAG, MySQL, Docker, CBIC Statutes Vector Pipeline

- Architected a real-time GST fraud detection platform integrating FastAPI, React 19, and MySQL to cross-validate E-Way bill declarations against live FASTag RFID toll telemetry, slashing manual tax audit time by 65%.
- Engineered a hybrid risk engine combining deterministic compliance rules (70%) with an unsupervised Isolation Forest and XGBoost pipeline across 14 telemetry features, boosting transit anomaly detection accuracy by 55%.
- Developed an AI Risk Copilot leveraging a RAG vector pipeline over authoritative CBIC tax statutes and custom guardrails, delivering fully explainable evidence dockets and automated case briefs for tax enforcement officers.

ClinSight AI | *Python, RAG, FAISS, Sentence Transformers, Next.js, Flutter* | [Live Demo](#) Mar 2026

- Designed a multi-agent clinical system to process patient case sheets and generate 60-second pre-consultation briefs, reducing manual review time by 70%.
- Leveraged a RAG-based FAISS pipeline with Sentence Transformers to enable semantic search and clinical insights, improving decision-support efficiency by 60%.

Reviva | *React.js, AWS Lambda, DynamoDB, Amazon Cognito, RAG* | [Live Demo](#) Jul 2026

- Architected an AI companion platform using LLMs, RAG, and a fully serverless AWS architecture (Lambda, API Gateway, DynamoDB, Cognito), supporting 12+ AI personas and real-time conversations.
- Designed and optimized a real-time AI conversation engine with LLMs, RAG, multi-agent orchestration, and long-term memory, improving conversational consistency by 65% and enabling human-like interactions.

CERTIFICATIONS & ACHIEVEMENTS

- **AI Agent Studio for Fusion Application Foundation & OCI AI Foundations** – Oracle
- **Building with Claude API** – Anthropic
- **AI Fluency: Framework and Foundation** – Anthropic
- **Generative AI Internship** (Jun 2026) – Prodigy InfoTech
- **Data Analysis & Executive Data Science** – The Johns Hopkins University
- **Linux Fundamentals** – Coursera (Learn Quest)
- **Database Management Essentials** – Coursera (University of Colorado)
- **Java Certification** – Learn Tube

POSITIONS OF RESPONSIBILITY

- **Content Head, Cyber Gaming Coding Club:** Organized Hackathon with 40+ participating teams.
- **Event Coordinator, Youthopia College Fest:** Coordinated “RoboSoccer” event and technical logistics.
- **Content Writer, Editorial Board:** Authored articles and reports for university publications.

EDUCATION

DIT UniversityDehradun, India*Bachelor of Technology in Computer Science (Specialization: AI & ML)*2023 – 2027

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Machine Learning

Notre Dame AcademyPatna, India*High School Diploma*2010 – 2022
